DETAILED ACTION

Double Patenting

1. Claims 1-26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 29-49 of U.S. Patent No. 6,732,219. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims are method claims while the pending claims are “code” claims. AKA a method done in software.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. § 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1,3-26 rejected under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter. The claimed tangible medium does not indicate that the medium is computer readable or operating on a computer. As claimed it could simply be code written on a piece of paper or as done by the Electronic Freedom Foundation code printed on a tea shirt.

Claim 2 is not rejected under 35 U.S.C. § 101 since it indicates the medium is a ROM BIOS that is inherently computer readable.

Allowable Subject Matter

3. Claims 1-26 would be allowable, Giving full faith and credit in the PN 6,732,219, for the same reasons as the claims of PN 6,732,219 baring a terminal disclaimer and amendment of the claims to indicate that the tangible medium is computer readable.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
